

GridLock coordination report

Prepared	September 27, 2026
Plan editions	SCRTP Planned Facilities 2026-2030 \$2M & Above SERTP 2025 Regional Transmission Plan (Nov 26 2025) / 2025-11-26
Filters	Distance band: Touching / crossing

KEY FIGURES

46 Pairs in this report	2 Cross-state pairs	46 Touching pairs	\$13,543,000 to \$27,791,000 Possible savings across 24 pairs with an estimate <i>Screening estimate, not a budget</i>
-----------------------------------	-------------------------------	-----------------------------	---

SELECTED PAIR

Pair #1 · score 5.8	
PROJECT A Dominion Energy SC Okatie – McIntosh 115kV Tie: Add Series Reactor In service 2028 · Location approximate Source: SCRTP Planned Facilities 2026-2030 \$2M & Above, p. 41	PROJECT B Georgia Power (inferred) MCINTOSH 230 KV, BREAKER CONTROL RELAY UPGRADES In service 2028 · Location exact Source: SERTP 2025 Regional Transmission Plan (Nov 26 2025), p. 107
Distance	0.0 km · Touching / crossing · Approximate locations: possibly touching.
Years to coordinate	2 years to coordinate
Possible saving	Possible saving (estimate): \$62,000 to \$264,000
Why together	Shared named endpoint. The Okatie–McIntosh 115 kV tie line names McIntosh as an endpoint. The DESC series reactor work is at new Deerfield Switching Station, location not stated; the SERTP relay work is at the McIntosh 230 kV bus (SCRTP Planned Facilities 2026-2030 \$2M & Above, p. 41; SERTP 2025 Regional Transmission Plan (Nov 26 2025), p. 107).
